

## D. SOCIAL MEDIA AND CHATGPT

### Check Social Media

Youtube

```
curl -s https://decapi.me/youtube/latest_video?  
user=networkchuck
```

Twitter

```
curl -s https://decapi.me/twitter/latest?  
name=networkchuck
```

### Define A Word

```
curl dict.org/d:contretemps
```

### Use ChatGPT In CMD With Curl

```
curl <https://api.openai.com/v1/chat/completions> -H  
"Authorization: Bearer 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"  
"Content-Type: application/json" -d "{\"model\": \"gpt-3.5-turbo\", \"messages\": [{\"role\": \"user\", \"content\": \"Who is NetworkChuck?\"}]}"
```

### Create A Batch File

"I want you to act as a Windows command terminal. I will type commands and you will reply with what the terminal should show. I want you to only reply with the terminal output inside one unique code block, and nothing else. Do not write explanations. Do not type commands unless I instruct you to do so. When I need to tell you something in English I will do so by putting text inside curly brackets {like this}. My first command is pwd."

## E. FILE AND FOLDER MANAGEMENT

### Visit A Website

```
start networkchuck.com
```

### Delete Temporary Files To Clear Space

```
del /q /f /s %temp%\*  
del /s /q C:\Windows\temp\*
```

### Telnet Telehack.com

Opens a Telnet session to the telehack.com server, allowing you to remotely access and interact with a simulated computer system from the 1980's

```
telnet telehack.com
```

### History Of Commands

```
doskey / history
```

## F. WINDOWS TERMINAL

### Use Windows Terminal Instead Of Command Prompt

1. Download and install Windows Terminal from the Microsoft Store or GitHub.
2. Launch Windows Terminal.
3. Click on the down arrow icon at the top of the window, next to the plus sign, and select "Settings".
4. In the "Settings" window, find the "defaultProfile" setting and set its value to the GUID of the terminal you want to use as the default (e.g. PowerShell, Command Prompt, or WSL).
5. Save the settings and close the "Settings" window.
6. To open a new terminal window, press "Ctrl+Shift+T" or click on the plus sign in the tab bar and select the terminal you want to open.

### Using Windows Terminal, You Can Drag And Drop Files To The Terminal When You Need The File Location

1. Open Windows Terminal and navigate to the directory where you want to run the command.
2. Open File Explorer and locate the file you want to get the location of.
3. Drag and drop the file onto the terminal window, and the full file path will be pasted into the terminal at the current cursor position.

### Open Terminal From Any Folder

```
Shift-right-click on the folder and select Terminal
```

### Get Help From Terminal

```
help
```

### Use PowerShell For Advanced Tasks Beyond Command Prompt

PowerShell is a powerful task automation and configuration management framework from Microsoft, consisting of a command-line shell and scripting language. It can perform advanced tasks beyond the capabilities of the Command Prompt.
